

Dräger X-pect® 8200 / 8300 Spectacles Protective Eyewear

The spectacles Dräger X-pect® 8200 and 8300 are designed for an optimal fit and high comfort. They feature a long life time thanks to high class materials. Each model provides special features, like soft nose bridge or flat and flexible temples, to fit your individual needs. All spectacles are compatible with respiratory protection like half masks.

Benefits

Very robust but extremely lightweight material

The material of the X-pect® 8200 and 8300 spectacles is very robust and stable due to polycarbonate material but is still extremely lightweight providing high comfort even during intensive use.

Soft nose bridge

Equipped with a soft nose bridge the spectacles provide high wearer comfort even in extreme conditions like warm or cold atmosphere.

Anti-scratch and anti-fog coating

The X-pect 8200 and 8300 spectacles feature an anti-scratch and anti-fog coating to ensure clear vision in the most arduous of situations.

Adjustability and flexibility for every individual face

Equipped with flat temples the spectacles X-pect 8310 are comfortable and suitable for any kind of hearing protection or helmets. The X-pect 8320 have got flexible temples providing minimum pressure and high wearer comfort. Both features are offered by the X-pect 8330 model – adjustability by an invisible ratchet as well as flexible and flat temples. The X-pect 8340 model is also adjustable, in angle as well as length, to provide comfortable fit. The suitable model for a perfect fit even in extreme conditions like warm or cold atmosphere, is the X-pect 8351 with its temple tips and nose bridge made of rubber.

Single lens for a large field of vision

The single lens of the spectacles provides a large field of vision for high comfort and user acceptance.

Wrap-around design, sportive and modern

The X-pect 8300 series offers a wrap-around design to ensure a perfect fit and lateral protection. Additionally, the spectacles are characterised by a modern and sporty look, making them very popular among users in industry, trade or for private use.

UV protection and best optical class

All X-pect 8200 and 8300 models offer the highest UV protection available and the best optical class (class 1) for continuous work. Additionally, it is certified in accordance with EN 166:2001 and is CE compliant.
